Sir:

In response to the Final Office Action mailed September 20, 2000, please amend this application as follows:

IN THE CLAIMS:

Please add claim 21 as follows:

- 1 21. (New) A method for purifying plasmid DNA suitable for pharmaceutical
2 use from bacterial cells on a large scale, the method comprising the following steps:
3 a) contacting bacterial cells which together comprise at least about 100
4 milligrams of the plasmid DNA with a lysis solution, thereby forming a lysis mixture;
5 b) flowing the lysis mixture through a first static mixer to obtain a lysed cell
6 solution;
7 c) contacting the lysed cell solution with a precipitation solution;
